

We are a
Michigan
Company

 **Precision Parts**

Engineering skills and experience are assets you will count on from PRESCO. We offer you the capability of producing your products, such as bulb sockets, light housings, terminals, ferrules, bearing races, eyelets, detonator caps, plugs, supports, slingers, bezels and so much more! From your blueprints or specifications, PRESCO's engineers will design and build the necessary tools and dies to produce the part you require.

Our services encompass manufacturing precision parts for:

- * Automotive Industry
- * Medical & Surgical
- * Aeronautics

 **Over 60 years of experience.**

Since 1946 PRESCO has served the industrial, automotive, military and commercial markets by combining a strong complement of machines with creative and dedicated metalworking specialists.

A whole new generation of machine tools have been integrated since its founding. Machines that excel in speed and productivity, keeping pace with the innovative developments in automatic transfer and eyelet presses, PRESCO has incorporated the best of these in its operation to provide you with the precision quality you demand and expect from us.

 **Mid-Western born and bred.**

PRESCO is proud to be one of the largest producers of deep drawn stampings in the Mid-West. Engineering skills and experience are assets you will count on from us.

Knowledgeable die makers offer the capability to modify existing designs or create entirely new products to meet your needs. We will work closely with you to ensure we exceed your expectations. Only the best equipment can handle production needs efficiently. Contact us today!

**Precision Stamping
Company, Inc.**

Serving the world since 1946

Deep Draw / Tubular

Our production facility can provide conventional and unconventional drawing. Deep drawing is a sheet metal forming process in which a sheet metal blank is radially drawn into a forming die by the mechanical action of a punch and strengthening the metal.

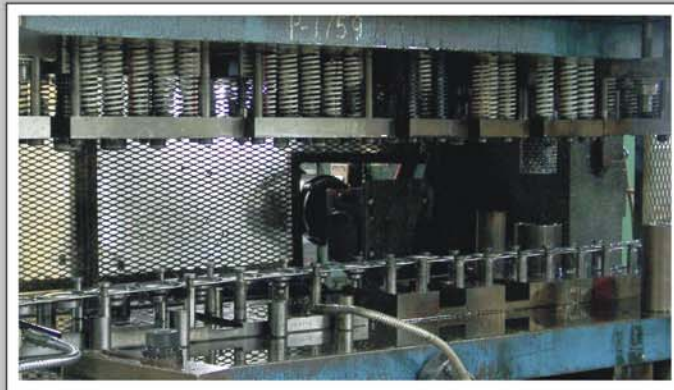

We manufacture our own tools to create the punches and dies necessary to create most custom deep drawn and tubular parts.

Only the best equipment can handle production needs efficiently. Reliable and flexible Minster high speed presses with tonnage ratings up to 200 tons operate within a 54" x 31" bed area and have a 5" stroke.

The Waterbury and U.S Baird Transfer presses, having a 3 5/8" maximum blank, size can draw shells to 3 1/8" in length in twelve operations to create:

- Eyelets
- Deep Drawn Tubes
- Closed End Tubes
- Grommets
- Shells
- Cups
- Rivets
- Connectors
- Caps
- Sleeves
- Housings
- Cramping Sleeves
- Washers
- And so much more!...

At PRESCO we manufacture an extensive variety of Deep Drawn products using an excellent selection of high quality and varied materials which include industry standard steel to exotic high temperature or medical grade materials.

We have ample experience with:

- Low Carbon Steels
- HSLA
- High Carbon Steels
- Stainless Steel
- Copper Alloys
- Brass
- Bronze
- Aluminum
- Coated Materials
- Decorative Finish Materials

Flat Stamping

PRESCO will design and develop any experimental concept our clients need through engineering, prototyping, in low and high volume production, forming, heat treating, plating and fabrication.

We will manufacture our Flat Stamping from coiled metal strips with high quality standards and your choice of materials

At PRESCO we fabricate precise parts economically without sacrificing quality because of our multislide stamping capabilities. We produce high volume quantities in a wide array of shapes and sizes with our high speed presses to meet your most demanding and intricate orders.

Our Flat Stamping services include:

- Engineering and part designing
- Cost effective process
- Yield dimensionally precise parts
- Orders are met accurately and on time

Brackets

PRESCO prides itself in being extremely responsive to our client's specific requirements, quick turn around, delivering quotes on orders, handling rush orders and having consistent on time delivery of parts.

We produce custom and non-custom brackets in many styles such as:

- Angle brackets (With standard or slotted holes)
- Mounting brackets
- Flat brackets (With standard or slotted holes)
- Terminal board brackets

Whatever part you require, you can be assured we will build it for you. Contact us today and let one of our team members meet and exceed your custom bracket requirements.
